

Get some "WUMA" in your life!

EES is launching his very own new vitamin energy drink "WUMA" in cooperation with OASIS. From the 7th November 2011 the NAM-FLAVA taste explosion will be available in all major retailer shops nationwide.

EES is known for being a very positive, hyperactive and energetic performer and artist – if on stage or in front of the camera! He surely knows how to show his appetite for life! His new energy drink represents the power behind the EES character and performances. WUMA is the first ever healthy vitamin energy drink produced in Namibia. The name "WUMA" can be directly translated into the English word "POWER" coming from the local Namibian "Kasi-Taal" language. Being a proudly local "NAM-boy 4 Life", - EES has decided to give his energy-drink a name that everybody in southern Africa can relate and identify themselves with. This is also a vision by the artist to create a local patriotism and give the country its own identity.

The WUMA drink is not just your average energy drink. The challenge to the making of this particular power drink, was to make it as healthy as possible by adding numerous Vitamins such as Vitamin C, B3, B6, B5, B9, biotin, B12 and Vitamin A (almost triple the amount a normal energy drink has) besides the energy boosting natural guarana, ginseng and caffeine substances. Produced by OASIS, "WUMA" is also made with "Quality A"- water from the Erongo Mountains, according to worldwide laboratory tests and bottled at source according to EU purity standards.

To give this energy drink a unique personalized taste, EES and his team took over a year research time to find that unique flavor that "WUMA" has. And what else – but to give the first taste the name of "NAM Flava"! ...which is the same name given to EES' – Kwaito orientated music mix. This will surely be the new trend-setter drink for the festive season – to give you more power to "PLAY"!

Further information can be found on the "WUMA"- Homepage www.wuma-drink.com or on www.facebook.com/WUMA-Drink
